

EWK GARDEN

FOR CONSUMERS

FOR PROFESSIONALS

Weed Control

No pesticides -
Just 100°C water

RENTAL DEVICES
Now Available

Eco Weedkiller Garden is the world's first affordable weed-control device using 100°C water, designed specifically for easy and safe use at home as well as for small-scale professional applications. **Eco Weedkiller Garden** heats 25 litres of water at a time, which is enough to treat approximately 8-10 m² of an area completely covered with weeds.

EWK GARDEN

	2 kW -model	3 kW -model
Power	10 A/230 V, 2000 W	16 A/230 V, 3000 W
Dimensions (L x W x H)	40 x 40 x 118 cm	40 x 40 x 118 cm
Weight	26 kg (empty) 51 kg (full)	26 kg (empty) 51 kg (full)
Water tank	25 l	25 l
Heating time	~ 2 h	~ 1,5 h
Hose length	3,5 m	3,5 m

EWK GARDEN

FOR CONSUMERS

FOR PROFESSIONALS

We wanted to develop an affordable and safe device for home gardeners as an alternative to manual weeding and chemicals. Pro's have also found useful applications for the Garden model.

The Eco Weedkiller Garden hot-water device is based on exactly the same principle as the equipment used by professionals: 100°C water. You can use tap water for the treatment, or, for example, rainwater that has been warmed by the sun.

A couple of days after treatment, the wilted plants are easy to remove if you want a neat and tidy finish. Often, the withered vegetation simply returns to the natural cycle with the help of the wind.

We at Eco Weedkiller develop and manufacture our devices to a high standard. Eco Weedkiller devices are designed to be repairable, and their “heart” is made of stainless steel, ensuring an exceptionally long service life. When, many years from now, your Eco Weedkiller Garden reaches the end of its life cycle, it can be almost completely recycled, minimizing its environmental impact. This is a true example of the principles behind the EU Green Deal.

The EWK Garden is mobile and ergonomic.

Thanks to the chemical-free treatment, the yard is safe to use immediately after application.

Eco Weedkiller destroys invasive species down to the roots.

Eco Weedkiller hot-water devices are designed for controlling invasive species and as versatile tools for property maintenance. The effectiveness of our devices is based on water heated to 100°C.

Thanks to our technology, the water retains its heat until it reaches the roots and destroys them. In other words, the devices transfer enough thermal energy to the plant roots to kill them. The droplets produced by the device are large, allowing the water to retain sufficient thermal energy to destroy the roots.

FEATURES

SAFE

Eco Weedkiller is environmentally friendly and does not damage surfaces.

EFFECTIVE

Hot water is effective against weed roots, dirt, and ice.

WATER-BASED

A chemical-free alternative — pure water is the only active ingredient.

BUILT TO LAST

Easy to maintain, with spare parts readily available.

EASY TO USE

No special skills, permits, or licenses required.

DESIGNED IN FINLAND

Collaboration between researchers and experts

THIS IS HOW IT WORKS

1

Fill the unit with regular tap water

2

Heat the water to 100°C

3

Apply hot water to unwanted plants

4

Remove dead plants if needed

5

Repeat 3-4 times a year to destroy root systems

Easy Weed Control with 100°C water.
