

EWK PRO20 DUAL

FOR PROFESSIONALS

Invasive plant control Weed control

Deep cleaning Drain opening

Ice-melting Pressure washing

Watering

No pesticides.
Only 100 °C water.

The **PRO20** multifunctional hot water unit is the largest weed-control unit equipped with a diesel engine and allows two people to work simultaneously. In addition to weed control, the **PRO20** is also suitable for cleaning, disinfection and drain opening.

EWK PRO20 DUAL

Users:	2
Power supply:	Hatz – diesel motor 9,3 kW
Power:	2x diesel fuel heaters 93 kW
Max. pressure:	150 bar
Water output:	Weed control, approx. 21 l/min (99-101°C)
Fuel consumption:	n. 14 l/h
Dimensions (L x W x H):	187 x 125 x 120 cm
Weight:	610 kg (empty) 1000 kg (full, water and fuel)
Fuel tank:	90 l
Water tank:	310 l
Hose reel:	1 x 80 m + 1 x 40m

EWK PRO20 DUAL

FOR PROFESSIONALS

In the PRO20 unit, the water is heated by two industrial heaters with a combined output of 186 kW. The system has a very high efficiency of over 95% and produces boiling water at approximately 20 l/min. This volume is also more than sufficient for the cost-effective removal of invasive plant species.

The unit can be connected to a property maintenance machine, tractor or van. This makes it possible to carry large quantities of water, improving work efficiency and minimizing time spent fetching water. Almost any existing tank can be used as an additional water reservoir.

The best treatment results are achieved by applying the water manually — nothing can replace the human ability to observe in this task. Various hose and nozzle options are available as accessories. Treatment hoses can be selected in lengths ranging from 40 metres up to 80 metres.

In addition to weed control, the unit can be used for pressure washing, ice melting, opening or thawing drains, graffiti removal, and plant watering. An optional ozone water generator is also available for odor removal and disinfection in different environments.

The PRO20 is a true all-rounder for comprehensive infrastructure maintenance!

Eco Weedkiller destroys invasive species down to the roots.

Eco Weedkiller hot-water devices are designed for controlling invasive species and as versatile tools for property maintenance. The effectiveness of our devices is based on water heated to 100°C.

Thanks to our technology, the water retains its heat until it reaches the roots and destroys them. In other words, the devices transfer enough thermal energy to the plant roots to kill them. The droplets produced by the device are large, allowing the water to retain sufficient thermal energy to destroy the roots.

FEATURES

SAFE

Eco Weedkiller is environmentally friendly and does not damage surfaces.

EFFECTIVE

Hot water is effective against weed roots, dirt, and ice.

WATER-BASED

A chemical-free alternative — pure water is the only active ingredient.

BUILT TO LAST

Easy to maintain, with spare parts readily available.

EASY TO USE

No special skills, permits, or licenses required.

DESIGNED IN FINLAND

Collaboration between researchers and experts

7IN1 - A TRUE MULTIPURPOSE DEVICE
