

EWK PRO8

FOR PROFESSIONALS

- Invasive plant control
- Weed control
- Deep cleaning
- Drain opening
- Ice-melting
- Pressure washing
- Watering

No pesticides.
Only 100 °C water.

PRO 8 is our smallest multifunctional hot-water device and is equipped with a Honda petrol engine, providing sufficient power and operating time. The **PRO 8** was designed as an affordable multifunctional hot-water device without compromising the temperature of the treatment water – it reaches 100 °C, just like all our devices. The compact unit is an excellent fit for a one-ton class van, trailer, or property maintenance machine.

EWK PRO8

Power supply:	Honda petrol engine
Power:	1 x diesel heater, 58 kW
Maximum pressure:	130 bar
Output (water):	Weed control, approx. 8 l/min (99–101 °C)
Fuel consumption:	Appr. 4,5 l/h (diesel)
Dimensions (L x W x H):	1320 x 1010 x 1150 mm
Weight:	Empty: 330 kg Full (water and fuel): 760 kg
Fuel tanks:	6.1 l (petrol) / 33 l (diesel)
Water tank capacity:	400 l
Hose reel:	50 m outlet hose

EWK PRO8

FOR PROFESSIONALS

In the PRO 8, the water is heated by a 58 kW industrial heater. The water heater has an extremely high efficiency of over 95% and produces 100°C water at approximately 8 litres per minute. This output is sufficient for basic weed control, general high-pressure washing, small drain-opening tasks, and thawing applications.

The device can be connected to a property maintenance machine, tractor, or van. This makes it possible to carry large amounts of water, enabling efficient work without wasting time fetching water.

Almost any existing tank can be used as an additional water tank. Different nozzle options are available as accessories. The treatment hose is 50 metres long, providing sufficient reach for most applications.

In addition to weed control, the device can be used for pressure washing, thawing, drain opening/thawing, and graffiti removal. An ozone water unit is also available as an optional accessory, enabling odour removal and deep cleaning in various environments. The PRO 8 series is a compact and affordable solution for comprehensive maintenance of the built environment.

Eco Weedkiller destroys invasive species down to the roots.

Eco Weedkiller hot-water devices are designed for controlling invasive species and as versatile tools for property maintenance. The effectiveness of our devices is based on water heated to 100°C.

Thanks to our technology, the water retains its heat until it reaches the roots and destroys them. In other words, the devices transfer enough thermal energy to the plant roots to kill them. The droplets produced by the device are large, allowing the water to retain sufficient thermal energy to destroy the roots.

FEATURES

SAFE

Eco Weedkiller is environmentally friendly and does not damage surfaces.

EFFECTIVE

Hot water is effective against weed roots, dirt, and ice.

WATER-BASED

A chemical-free alternative — pure water is the only active ingredient.

BUILT TO LAST

Easy to maintain, with spare parts readily available.

EASY TO USE

No special skills, permits, or licenses required.

DESIGNED IN FINLAND

Collaboration between researchers and experts

7IN1 - A TRUE MULTIPURPOSE DEVICE
