

EWK PRO SP MINI

FOR PROFESSIONALS

Weed Control

Invasive plant control

No pesticides -
Just 100°C water

The **PRO SP Mini** is a compact, nearly silent, fully electric hot-water device with a 150-litre tank. It is ideal for small areas, rental use, or as a support tool for gardeners on larger properties. It can also be used for targeted treatments, such as removing dandelions from lawns.

EWK PRO SP MINI

Power	3 kW/9 kW
Voltage	230 V/400 V - 50 Hz / 12 V
Heating time	6h (230V) / 2h (400V)
Water output	n. 6 l/min (100°C)
Max. pressure	3 bar
Dimensions (L x W x H)	115 x 72 x 110 cm
Weight (empty)	160 kg
Weight (full)	310 kg
Water tank	150 l
Hose reel	18 m
IP-rating	IP44

EWK PRO SP MINI

FOR PROFESSIONALS

The Eco Weedkiller PRO SP Mini is a fully electric, batch-heated hot-water device with a 150-litre water tank. One full tank can treat approximately 50–75 m² of an area completely covered with weeds. The device is almost silent during operation. Only the gentle sound from the nozzle indicates that the water has reached the correct temperature for effective weed control. This makes the PRO SP Mini ideal for noise-sensitive environments—for example, work can continue around a daycare centre without disturbing children during nap time.

The PRO SP Mini was developed based on user feedback and is a versatile solution for a wide range of applications. Thanks to its compact size and low weight, it is easy to transport using an ATV or ride-on mower. Most importantly, no mains electricity or water connection is required during operation, giving the user complete freedom of movement.

In the SP Mini, water serves two purposes: it transfers heat to the target plant and stores energy. In this sense, water acts as a cost-effective “battery” compared with conventional electric batteries. Because the water is heated using electricity, users can choose the source of that electricity and reduce the environmental impact accordingly. The device can even be connected directly to solar panels.

Eco Weedkiller destroys invasive species down to the roots.

Eco Weedkiller hot-water devices are designed for controlling invasive species and as versatile tools for property maintenance. The effectiveness of our devices is based on water heated to 100°C.

Thanks to our technology, the water retains its heat until it reaches the roots and destroys them. In other words, the devices transfer enough thermal energy to the plant roots to kill them. The droplets produced by the device are large, allowing the water to retain sufficient thermal energy to destroy the roots.

FEATURES

SAFE

Eco Weedkiller is environmentally friendly and does not damage surfaces.

EFFECTIVE

Hot water is effective against weed roots, dirt, and ice.

WATER-BASED

A chemical-free alternative — pure water is the only active ingredient.

BUILT TO LAST

Easy to maintain, with spare parts readily available.

EASY TO USE

No special skills, permits, or licenses required.

DESIGNED IN FINLAND

Collaboration between researchers and experts

THIS IS HOW IT WORKS

1

Fill the unit with regular tap water

2

Heat the water to 100°C

3

Apply hot water to unwanted plants

4

Remove dead plants if needed

5

Repeat 3-4 times a year to destroy root systems

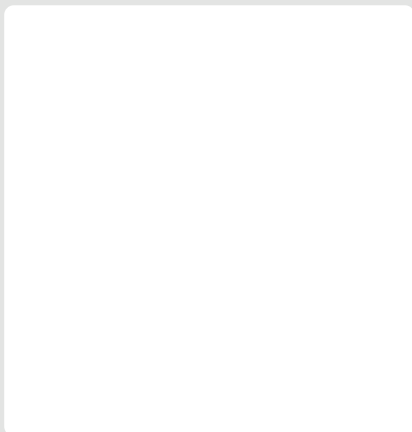

**Easy Weed Control with
100°C water.**
